CAREER OBJECTIVE – Motivated Computer Science undergraduate with hands-on experience in building real-time web applications using Firebase and modern frontend technologies. Seeking an internship opportunity to apply my development skills to solve real-world problems.

Projects

mdc-nuapada | College | October 2025

- Build a responsive college website to centralize information, improving accessibility and navigation.
- Integrated Cloudinary for media optimization and deployed using Firebase Hosting, enhancing performance and scalability.

AroundU | College Event Management | March 2026

- Developed a web-based event management platform full with CRUD functionality to streamline event creation and updates.
- Implemented Firebase Authentication and Realtime Database for secure access and real-time data synchronization, improving student engagement.

Skills

- **Languages:** HTML, CSS, JavaScript, Python
- **Technologies:** Firebase, Cloudinary, Git, GitHub
- **Concepts:** CRUD Operations, Authentication, Responsive Design

Education

Bachelor of Science in Computer Science | Model Degree College Nuapada | Maa Manikeshwari University

- 5th semester 9.48 SGPA | 6th semester Result Awaited

Achievements

- Built and deployed multiple real-world web applications using Firebase
- Strong understanding of frontend development and real-time database integration using Firebase
